

The Paradox of $2=1$

$1 = 2$ helps

$4 = 2$ On sheets - 4 eyes visually = 2 eyes cognitively

(if you are to read it as gnomagadit)

$4=2 \therefore 2=1$

The Paradox is RAVEN

Paradox, the name is Raven

"He" is 2 things at once: equivalent opposites

"He" is all oppositions equivalenced in one.

"He" is 2 in 1

His own mother and father

His own grandfather at the Head of the Press

When he is doing things to others he is really doing them to himself, because he is both at the same time.

Raven cannot die (be killed), he can only endlessly transform

When did Time start?

When Raven made the world?

" " gave light to the world? (Raven Rattle)

Eternity is the ^{get off} moment Raven recognizes herself
(Raven sees) (you recognize Raven)

The moment you shake the rattle

When Raven was born? and gave birth to her Mother?
